

LEASE FINANCING FOR YOUR FARM WITH CONTAIN INC.

Contain Inc. works with lenders to offer lease financing for indoor farm equipment. Here's a little more information on how that works.

What kind of terms do you offer?

Our lenders typically offer 3-5 year leases for capital equipment (e.g. LED lights, grow systems, control systems, racking). Rates vary depending on the individual situation, but we have achieved rates as low as 6.5%.★

How do we apply?

You can apply through our website at www.contain.ag.

What information do we need to apply?

We'll need to know your current income and assets, along with your last two years' tax returns. We'll also need to know the cost of your farm equipment.

How long does the process take?

We can generally get back to you with rate offers within 24 hours, and can finalize the agreement as little as 36 hours if you need a fast close.

What's the advantage of working with your partners?

We've partnered with leading equipment suppliers - AmHydro, Bright Agrotech, CropKing - to offer lease financing to their customers. We already know their equipment so can offer you a faster, simpler leasing process.

Can we lease from you if we're working with other equipment suppliers?

Probably. The process might take a little longer as we'll need to qualify the equipment supplier with our lenders.

We're planning our first farm and aren't farming right now. Can we still work with you?

Of course! You will typically need another source of income to qualify.
